From Miller to You

Thank you and congratulations on choosing Miller. Now you can get the job done and get it done right. We know you don’t have time to do it any other way.

That’s why when Niels Miller first started building arc welders in 1929, he made sure his products offered long-lasting value and superior quality. Like you, his customers couldn’t afford anything less. Miller products had to be more than the best they could be. They had to be the best you could buy.

Today, the people that build and sell Miller products continue the tradition. They’re just as committed to providing equipment and service that meets the high standards of quality and value established in 1929.

This Owner’s Manual is designed to help you get the most out of your Miller products. Please take time to read the Safety precautions. They will help you protect yourself against potential hazards on the worksite. We’ve made installation and operation quick and easy. With Miller you can count on years of reliable service with proper maintenance. And if for some reason the unit needs repair, there’s a Troubleshooting section that will help you figure out what the problem is. The parts list will then help you to decide which exact part you may need to fix the problem. Warranty and service information for your particular model are also provided.

Miller is the first welding equipment manufacturer in the U.S.A. to be registered to the ISO 9001 Quality System Standard.

Miller Electric manufactures a full line of welders and welding related equipment. For information on other quality Miller products, contact your local Miller distributor to receive the latest full line catalog or individual catalog sheets. To locate your nearest distributor or service agency call 1-800-4-A-Miller, or visit us at www.MillerWelds.com on the web.
1-1. Symbol Usage

Means Warning! Watch Out! There are possible hazards with this procedure! The possible hazards are shown in the adjoining symbols. Marks a special safety message. Marks a special safety message.

This group of symbols means Warning! Watch Out! possible ELECTRIC SHOCK, MOVING PARTS, and HOT PARTS hazards. Consult symbols and related instructions below for necessary actions to avoid the hazards.

1-2. Arc Welding Hazards

WARNING

The symbols shown below are used throughout this manual to call attention to and identify possible hazards. When you see the symbol, watch out, and follow the related instructions to avoid the hazard. The safety information given below is only a summary of the more complete safety information found in the Safety Standards listed in Section 1-4. Read and follow all Safety Standards.

Only qualified persons should install, operate, maintain, and repair this unit.

During operation, keep everybody, especially children, away.

ELECTRIC SHOCK can kill.

1. Do not touch live electrical parts.
2. Wear dry, hole-free insulating gloves and body protection.
3. Insulate yourself from work and ground using dry insulating mats or covers big enough to prevent any physical contact with the work or ground.
4. Disconnect input power before installing or servicing this equipment. Lockout/tagout input power according to OSHA 29 CFR 1910.147 (see Safety Standards).
5. Properly install and ground this equipment according to its Owner's Manual and national, state, and local codes.
6. Always verify the supply ground – check and be sure that input power cord ground wire is properly connected to ground terminal in disconnect box or that cord plug is connected to a properly grounded receptacle outlet.
7. When making input connections, attach proper grounding conductor first – double-check connections.
8. Frequently inspect input power cord for damage or bare wiring – replace cord immediately if damaged – bare wiring can kill.
9. Turn off all equipment when not in use.
10. Do not use worn, damaged, oversized, or poorly spliced cables.
11. Do not drape cables over your body.
12. If earth grounding of the workpiece is required, ground it directly with a separate cable – do not use work clamp or work cable.
13. Do not touch electrode if you are in contact with the work, ground, or another electrode from a different machine.
14. Use only well-maintained equipment. Repair or replace damaged parts at once. Maintain unit according to manual.
15. Wear a safety harness if working above floor level.
16. Keep all panels and covers securely in place.
17. Clamp work cable with good metal-to-metal contact to workpiece or worktable as near the weld as practical.

ARC RAYS can burn eyes and skin; NOISE can damage hearing; FLYING SLAG OR SPARKS can injure eyes.

Arc rays from the welding process produce intense visible and invisible (ultraviolet and infrared) rays that can burn eyes and skin. Noise from some processes can damage hearing. Chipping, grinding, and welds cooling throw off pieces of metal or slag.

1. Use approved ear plugs or ear muffs if noise level is high.
2. Wear a welding helmet fitted with a proper shade of filter to protect your face and eyes when welding or watching (see ANSI Z49.1 and Z87.1 listed in Safety Standards).
3. Wear approved safety glasses with side shields.
4. Use protective screens or barriers to protect others from flash and glare; warn others not to watch the arc.
5. Wear protective clothing made from durable, flame-resistant material (wool and leather) and foot protection.

FUMES AND GASES can be hazardous to your health.

Welding produces fumes and gases. Breathing these fumes and gases can be hazardous to your health.

1. Keep your head out of the fumes. Do not breathe the fumes.
2. If inside, ventilate the area and/or use exhaust at the arc to remove welding fumes and gases.
3. If ventilation is poor, use an approved air-supplied respirator.
4. Read the Material Safety Data Sheets (MSDSs) and the manufacturer's instruction for metals, consumables, coatings, cleaners, and degreasers.
5. Work in a confined space only if it is well ventilated, or while wearing an air-supplied respirator. Always have a trained watchperson nearby. Welding fumes and gases can displace air and lower the oxygen level causing injury or death. Be sure the breathing air is safe.
6. Do not weld in locations near degreasing, cleaning, or spraying operations. The heat and rays of the arc can react with vapors to form highly toxic and irritating gases.
7. Do not weld on coated metals, such as galvanized, lead, or cadmium plated steel, unless the coating is removed from the weld area, the area is well ventilated, and if necessary, while wearing an air-supplied respirator. The coatings and any metals containing these elements can give off toxic fumes if welded.
1-3. Additional Installation, Operation, And Maintenance Hazards

**FIRE OR EXPLOSION** can result from placing unit on, over, or near combustible surfaces.

1. Do not install unit on, over, or near combustible surfaces or flammables.

**HOT PARTS** can cause severe burns.

1. Do not touch hot parts bare handed. Allow cooling period before beginning.

**MAGNETIC FIELDS FROM HIGH CURRENTS** can affect pacemaker operation.

1. Wearers should consult their doctor before going near arc welding, gouging, or spot welding operations.

**FLYING PIECES OF METAL or DIRT** can injure eyes.

1. Wear safety glasses with side shields or face shield.

1-4. Principal Safety Standards

**Safety in Welding and Cutting**, ANSI Standard Z49.1, from American Welding Society, 550 N.W. LeJeune Rd, Miami FL 33126

**Safe Practices For Occupation And Educational Eye And Face Protection**, ANSI Standard Z87.1, from American National Standards Institute, 1430 Broadway, New York, NY 10018.

**Cutting And Welding Processes**, NFPA Standard 51B, from National Fire Protection Association, Batterymarch Park, Quincy, MA 02269.

1-5. EMF Information

**Considerations About Welding And The Effects Of Low Frequency Electric And Magnetic Fields**

The following is a quotation from the General Conclusions Section of the U.S. Congress, Office of Technology Assessment, *Biological Effects of Power Frequency Electric & Magnetic Fields – Background Paper*, OTA-BP-E-53 (Washington, DC: U.S. Government Printing Office, May 1989): “...there is now a very large volume of scientific findings based on experiments at the cellular level and from studies with animals and people which clearly establish that low frequency magnetic fields can interact with, and produce changes in, biological systems. While most of this work is of very high quality, the results are complex. Current scientific understanding does not yet allow us to interpret the evidence in a single coherent framework. Even more frustrating, it does not yet allow us to draw definite conclusions about questions of possible risk or to offer clear science-based advice on strategies to minimize or avoid potential risks.”

To reduce magnetic fields in the workplace, use the following procedures:

1. Keep cables close together by twisting or taping them.
2. Arrange cables to one side and away from the operator.
3. Do not coil or drape cables around the body.
4. Keep welding power source and cables as far away as practical.
5. Connect work clamp to workpiece as close to the weld as possible.

**About Pacemakers:**

The above procedures are also recommended for pacemaker wearers. Consult your doctor for complete information.
2-1. Selecting A Location And Installing Handle

1. Lifting Area
   Place hands where shown to move unit. Get help when moving unit.
2. Running Gear Mounting Holes
3. Rating Label
   Locate unit near correct input power.
4. Amperage Adjustment Rod
5. Handle
6. Pin
   Install as shown.
   Move pin into locked position shown.

2-2. Weld Output Cables

For weld output cable replacements or extensions, contact your Factory Authorized Service Agent.
2-3. Connecting Input Power

⚠️ Have only qualified persons make this installation.

Minimum input and grounding conductor size is 10 AWG/Kcmil, not to exceed 87 ft (26 m) in length. Install conductors in conduit or equivalent into a deenergized line disconnect device. Maximum recommended standard fuse or circuit breaker rating is 70 amperes. Size and ratings must comply with applicable codes.

Tools Needed:

- 3/8 in

230 VAC, 1 GND/PE L2 L1

Downloads from www.Manualslib.com manuals search engine
SECTION 3 – OPERATION

3-1. Controls

1. Amperage Control
2. Amperage Range Indicator
3. Electrode (30–150 A) Weld Output Receptacle
4. Electrode (40–225 A) Weld Output Receptacle
   When welding below 150 amps, use 30–150 A receptacle.
5. Work Weld Output Receptacle
6. Power Switch

3-2. Duty Cycle Chart And Volt-Ampere Curves

Duty Cycle is percentage of 10 minutes that unit can weld at rated load without overheating.

⚠️ 20% Duty Cycle at 225 Amperes. Exceeding duty cycle can damage unit and void warranty.

The volt-ampere curves show the minimum and maximum voltage and amperage output capabilities. Curves of other settings fall between the curves shown.
4-1. Routine Maintenance

- Disconnect power before maintaining.

| 3 Months |
|------------------|------------------|
| ![Image] Replace Unreadable Labels | ![Image] Repair Or Replace Cracked Cables |
| ![Image] Clean And Tighten Weld Connections |

| 6 Months |

</tr>
</thead>
<tbody>
<tr>
<td>![Image]</td>
</tr>
</tbody>
</table>

4-2. Lubricating Shunt Block And Anti-Noise Adjustment

- Turn Off welding power source and disconnect input power.

1. Shunt Block
   - Apply light coating of high-temperature grease to shaded areas of both shunt blocks.
   - Install amperage control handle and locking pin. Turn handle to spread grease evenly.

2. Noise Adjustment Screws
   - If shunt block vibrates and becomes noisy, tighten adjustment screws 1/4 turn. Install wrapper, handle, and pin, turn On unit, and check for shunt noise. Repeat procedure until noise stops. Do not overtighten. Call your nearest Factory Authorized Service Agent if noise continues.
   - Reinstall wrapper, handle, and pin.

Tools Needed:

1. Handle
2. Pin
### 4-3. Troubleshooting

A handle and two wheels with solid rubber tires mount easily to the frame of the Thunderbolt 225, providing convenient portability.
**TRUE BLUE® WARRANTY**

**Effective January 1, 2000**

(Equipment with a serial number preface of “LA” or newer)

This limited warranty supersedes all previous Miller warranties and is exclusive with no other guarantees or warranties expressed or implied.

**LIMITED WARRANTY** – Subject to the terms and conditions below, Miller Electric Mfg. Co., Appleton, Wisconsin, warrants to its original retail purchaser that new Miller equipment sold after the effective date of this limited warranty is free of defects in material and workmanship at the time it is shipped by Miller. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.

Within the warranty periods listed below, Miller will repair or replace any warranted parts or components that fail due to such defects in material or workmanship. Miller must be notified in writing within thirty (30) days of such defect or failure, at which time Miller will provide instructions on the warranty claim procedures to be followed.

Miller shall honor warranty claims on warranted equipment listed below in the event of such a failure within the warranty time periods. All warranty time periods start on the date that the equipment was delivered to the original retail purchaser, or one year after the equipment is sent to a North American distributor or eighteen months after the equipment is sent to an International distributor.

1. **5 Years Parts – 3 Years Labor**
   - Original main power rectifiers
   - Inverters (input and output rectifiers only)
2. **3 Years Parts and Labor**
   - Transformer/Rectifier Power Sources
   - Plasma Arc Cutting Power Sources
   - Semi-Automatic and Automatic Wire Feeders
   - Inverter Power Supplies
   - Intellitig
   - Engine Driven Welding Generators (NOTE: Engines are warranted separately by the engine manufacturer.)
3. **1 Year Parts and Labor**
   - DS-2 Wire Feeder
   - Motor Driven Guns (w/exception of Spoolmate 185 & Spoolmate 250)
   - Process Controllers
   - Positioners and Controllers
   - Automatic Motion Devices
   - RFCs Foot Controls
   - Induction Heating Power Sources
   - Water Coolant Systems
   - HF Units
   - Grids
   - Maxstar 140
   - Spot Welders
   - Load Banks
   - Miller Cyclomatic Equipment
   - Running Gear/Trailers
   - Plasma MIG Cutting Torches (except APT & SAF Models)
   - Field Options (NOTE: Field options are covered under True Blue® for the remaining warranty period of the product they are installed in, or for a minimum of one year — whichever is greater.)

4. **6 Months — Batteries**
5. **90 Days — Parts**
   - MIG Guns/TIG Torches
   - Induction Heating Coils and Blankets

**MILLER PRODUCTS ARE INTENDED FOR PURCHASE AND USE BY COMMERCIAL/INDUSTRIAL USERS AND PERSONS TRAINED AND EXPERIENCED IN THE USE AND MAINTENANCE OF WELDING EQUIPMENT.**

In the event of a warranty claim covered by this warranty, the exclusive remedies shall be, at Miller’s option: (1) repair; or (2) replacement; or, where authorized in writing by Miller in appropriate cases, (3) the reasonable cost of repair or replacement at an authorized Miller service station; or (4) payment of or credit for the purchase price (less reasonable depreciation based upon actual use) upon return of the goods at customer’s risk and expense. Miller’s option of repair or replacement will be F.O.B., Factory at Appleton, Wisconsin, or F.O.B. at a Miller authorized service facility as determined by Miller. Therefore no compensation or reimbursement for transportation costs of any kind will be allowed.

**TO THE EXTENT PERMITTED BY LAW, THE REMEDIES PROVIDED HEREIN ARE THE SOLE AND EXCLUSIVE REMEDIES AVAILABLE TO THE PURCHASER. IN NO EVENT SHALL MILLER BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING LOSS OF PROFIT), WHETHER BASED ON CONTRACT, TORT OR ANY OTHER LEGAL THEORY.**

ANY EXPRESS WARRANTY NOT PROVIDED HEREIN AND ANY IMPLIED WARRANTY, GUARANTEE OR REPRESENTATION AS TO PERFORMANCE, AND ANY REMEDY FOR BREACH OF CONTRACT TORT OR ANY OTHER LEGAL THEORY WHICH, BUT FOR THIS PROVISION, MIGHT ARISE BY IMPLICATION, OPERATION OF LAW, CUSTOM OF TRADE OR COURSE OF DEALING, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE, WITH RESPECT TO ANY AND ALL EQUIPMENT FURNISHED BY MILLER IS EXCLUDED AND DISCLAIMED BY MILLER.

Some states in the U.S.A. do not allow limitations of how long an implied warranty lasts, or the exclusion of incidental, indirect, special or consequential damages, so the above limitation or exclusion may not apply to you. This warranty provides specific legal rights, and other rights may be available, but may vary from state to state.

In Canada, legislation in some provinces provides for certain additional warranties or remedies other than as stated herein, and to the extent that they may not be waived, the limitations and exclusions set out above may not apply. This Limited Warranty provides specific legal rights, and other rights may be available, but may vary from province to province.

Your distributor also gives you ... Service You always get the fast, reliable response you need. Most replacement parts can be in your hands in 24 hours. Support Need fast answers to the tough welding questions? Contact your distributor. The expertise of the distributor and Miller is there to help you, every step of the way.
